# EFFECT OF EXCELLENCE

finishes | interaction | feeling | personality

We offer a refined range of colours and finishings, which allows taking advantage of the feeling transmitted through colour and of the sensation provided by different textures.

The correct combination of colour helps to provide coherent and aesthetically attractive environments that can trigger various emotions in people: hot colours create cosy and pleasant environments and transmit feelings of comfort, joy or tranquillity, whereas cold colours have a functional, clean and modest effect, triggering feelings of concentration or alertness in the user.

We are able to implement projects that require a high level of customisation in terms of finishes.

As an option, it is possible to combine infinite combinations in the same product.
